# SMART SOLUTIONS

**EN**

## TST Group Worldwide

Founded over 30 years ago, we now have a Production Facility that occupies over 11.700 sq m<sup>2</sup>. Our broad range of products are designed, manufactured and constantly developed under the same roof, to meet the needs of our Worldwide Customers.

**tst** is fully integrated manufacturer of quick connect/disconnect couplings, for hydraulic, pneumatic, vacuum, gas, chemical fluid and water applications, in addition to multi couplers, fittings, hoses and accessories.

The latest technologies are utilized to Manufacture and Assembly our wide range of products to the required specifications to achieve Zero Defects and 100% Delivery Performance.

**DE**

## TST Gruppe weltweit

Gegründet vor 30 Jahren verfügen wir mittlerweile über eine Produktionskapazität auf Basis modernster CNC Technik auf über 11.700 m<sup>2</sup> Fläche. Um die Ansprüche unserer weltweiten Kunden zu erfüllen, sind Entwicklung und Produktion am gleichen Standort eng miteinander verbunden.

**tst** ist ein Hersteller von Schnellverschlusskupplungen für die Bereiche Hydraulik, Pneumatik, Vakuum, Gas, chemische Anwendungen, sowie Wasserapplikationen. Dies umfasst sowohl Einzelkupplungen als auch Multikupplungen, Verbindungselemente, Schläuche und Zubehör.

Um bei unserer breiten Angebotsvielfalt sowohl in der Herstellung als auch in der Montage absolute Liefertreue bei einer Fehlerquote von 0 ppm zu erreichen greifen wir auf modernste Fertigungsmethoden, langjährige Mitarbeitererfahrungen und einen sehr jungen Maschinenpark (vornehmlich CNC Technik) zurück.

# FOR INDUSTRIAL CONNECTIONS

FR

## TST, un groupe international

La Société TST fondée depuis plus de 30 ans dispose d'un site de fabrication de plus de 11.700m<sup>2</sup> où l'ensemble des produits sont dessinés, fabriqués et où le service développement est sans cesse à l'écoute des clients.

**tst** dispose de l'ensemble des produits coupleurs rapide comme le coupleur air, eau industrie ainsi que les coupleurs spéciaux "plasturgie" ou "hydraulique" ainsi que les gammes multi-connecteurs, manifolds, tubes, colliers et accessoires.

Toutes les technologies à la pointe de la technique sont utilisées sur toutes les phases de conception et production afin de vous assurer 100% de satisfaction quant à la performance des produits.

NL

## TST, een wereldwijde organisatie

30 jaar geleden werd TST opgericht, inmiddels beschikken we over een productiefaciliteit die meer dan 11.700m<sup>2</sup> in beslag neemt.

Om te kunnen voldoen aan de behoeftes van onze wereldwijde klanten wordt ons brede assortiment aan producten onder één dak ontworpen, geproduceerd en doorontwikkeld.

**tst** is producent van snelkoppelingen, voor hydraulische, pneumatische, gas, vacuüm, chemische vloeistoffen en water-gerelateerde toepassingen. Daarnaast produceert TST ook enkele koppelingen, meervoudige koppelingen, verbindingselementen, fittingen, slangen en overige toebehoren.

# Symbol of Types

## Symbol Index

**B**

TYPE

**EN****B Type Double Shut Off Series Couplings**

Both plug and coupling include the valve therefore self sealing is obtained regardless of the direction of flow.

During disconnection, the flow will be blocked by the valves.

**DE****B Typ doppelseitig absperrende Kupplungsserie**

Sowohl der Nippel wie die Kupplung sind mit einem Ventil versehen, so dass die Abdichtung unabhängig von der Durchflussrichtung sichergestellt werden kann.

Nach dem Entkuppeln wird der Durchfluss durch das Ventil gesperrt.

**D**

TYPE

**D Type Double Shut off Couplings**

Both plug and valve include the valve therefore self sealing is obtained regardless of the direction of flow.

During disconnection, the plug must be pushed into the coupling which provides a safety feature preventing accidents in medical applications.

**D Typ doppelseitig absperrende Kupplung**

Sowohl der Nippel als auch das Ventil umfassen das Ventil, so dass unabhängig von der Strömungsrichtung eine Selbstdichtung erzielt wird.

Während des Trennens muss der Nippel in die Kupplung geschoben werden, was eine Sicherheitsfunktion bietet und die Unfälle in medizinischen Anwendungen verhindert.

**E**

TYPE

**E Type Single Shut Off Couplings**

Only the coupling includes valve therefore used in systems where the flow direction is from coupling to plug.

During disconnection, the plug must be pushed into the coupling which provides a safety feature.

**E Typ einseitig absperrende Kupplung**

Nur die Kupplung enthält ein Ventil, das daher in Systemen verwendet wird, bei denen die Durchflussrichtung von Kupplung zu Nippel verläuft.

Beim entkuppeln muss der Stecker in die Kupplung gedrückt werden, was eine Sicherheitsfunktion bietet.

**F**

TYPE

**F Type Thru-flow Couplings**

Coupling and plug do not include valve therefore no sealing is obtained.

This type is generally used where sealing is not important.

**F Typ Kupplung mit vollem Durchgang**

Kupplung und Nippel sind ventillos, daher wird keine Dichtung erreicht.

Dieser Typ wird im Allgemeinen verwendet, wenn nur die Verbindung, jedoch nicht die Abdichtung im Vordergrund steht.

**K**

TYPE

**K Type Coded Couplings**

Coupling and plug have geometrical connection designs which only enables same geometrical shapes connect each other.

This type prevents mismatches. Self sealing is optional.

Please contact us to clarify which sealing option you prefer.

**K Typ Kodierte Kupplung**

Kupplung und Nippel haben geometrische Verbindungsdesigns, die nur die Verbindung derselben geometrischen Formen ermöglichen.

Dieser Typ verhindert Fehlverbindungen. Selbstdichtende Versionen sind optional erhältlich. Kontaktieren Sie uns, um zu klären, welche geobetrische Form Sie bevorzugen.

**L**

TYPE

**L Type Coded Couplings**

Both coupling and plug include the valve and they close simultaneously while disconnection.

The unique valf designs both sides prevent leakage during disconnection and obtain dry break.

**L Typ kodierte Kupplung**

Kupplung und Nippel haben geometrische Verbindungsdesigns. Dieser Typ verhindert Fehlverbindungen. Selbstdichtung ist optional.

Kontaktieren Sie uns, um zu klären, welche Geometrie Sie bevorzugen.

**S**

TYPE

**S Type Coded Couplings**

Only the coupling includes valve therefore used in systems where the flow direction is from coupling to plug. Generally used in push-button couplings where a secure disconnection is required.

Disconnection of the plug is possible only after two consecutive pushes; one for releasing the residual pressure and the second one to eject the plug.

**S Typ kodierte Kupplung**

Nur die Kupplung enthält ein Ventil, daher die Verwendung, bei denen die Durchflussrichtung von Kupplung zu Stecker verläuft. Wird im Allgemeinen in Druckknopfkupplungen verwendet, bei denen eine sichere Trennung erforderlich ist.

Das Lösen des Steckers ist nur nach zwei aufeinanderfolgenden Drücken (zwei Stufen) möglich. Eine zum Ablassen des Restdrucks und die zweite zum Auswerfen des Stopfens.

## Icon Index

# Icons Related With Application Area

The pressure range vary for each product shown in this leaflet. Before ordering, please mention the application pressure to make sure the product meets the system requirements.

Temperature range of our products vary according to the sealing components chosen. Most common sealing types are listed below. For custom requirements, please contact us.

Is the actual diameter which fluid passes through. TST is capable of manufacturing products with nominal diameter of DN 2,5 mm's up to DN 75 mm's.

### FLOW SYMBOLS

**THROUGH FLOW**  
(Both Sides are Without Valve)

**SINGLE SHUT OFF**  
(One Side is With Valve)

**DOUBLE SHUT OFF**  
(Both Sides are With Valve)

### MATERIAL ICONS

**Brass**

Ms 58

**Al**

Aluminium

**Steel**

**AISI303**

Stainless Steel

**AISI316**

Stainless Steel

**AISI420**

Stainless Steel

### SEALING OPTIONS

FPM : -26°C to + 200°C (not recommended for water steam)

NBR : -40°C to + 105°C

EPDM : -50°C to + 135°C

HT : -26°C to + 200°C (better durability for water steam)

FFKM : -15°C to + 325°C

## Security Icons

**E1**  
The safety is provided by a pin on the sleeve to prevent disconnection by mistake.

**E2**  
This is an upgraded version of E1.

**E3**  
Safety is provided by an additional nut screwed to the back of the sleeve to prevent accidental disconnection.

**2 STAGE**  
Security is provided by pressing the button two times or by left-right sleeve twist. First press/twist releases the pressure inside the coupling and the second press/twist ejects the plug for disconnection.

**SWING**  
This design is normally used in systems where confusion is certainly avoided by the geometrical design in the interior touch points of both plugs and couplings.

**PD**  
This is a built-in safety design type founded by Oetiker Inc. working in principle of ball valves in rotation with a locking sleeve. TST acquired Oetiker Inc.'s quick coupling division in 2012.

## OTHER ICONS

**FLOW**  
Flow rate

**FF**  
Flat face

**HP**  
Special design of the valve for high pressure

**REC**  
The number of input and outputs in multicoupling systems

**THRD**  
Thread size

**NICKEL**  
Nickel Plated

**SWIVEL**  
Connection under pressure

**L**  
360 °C rotation of the back part

**IN**  
Length

**OUT**  
Input thread size

**SW**  
Output thread size

**SW**  
Hexagon size
